Testimonials

"The content was very comprehensive. Opened up new perspective of project management, the concept and thinking of Agile. The way trainer shared and engaged everyone in the training was brilliant." ~ *Product Owner (Philip Morris International)*

"The training provided a practical approach to organising and prioritising work. We are able to keep track of what has been done, what is currently being worked on and what needs to be worked on, as well as reprioritising work as we go." ~ *Project Engineer (Time)*

"The training provided us a platform to understand how Agile actually worked. We did some other trainings earlier but nothing came close to the way Dr Sanath delivered and systematically presented the materials. Understand that the subject is huge but was made palatable." ~ *Project Manager (Ascertain)*

"Extremely clear now. Very comprehensively delivered. All areas were covered. The curated practical session set the bar of what I am expecting for future training session." ~ *Manager (Paradigm Systems)*
